

2 DAYS

Intended Audience

This intermediate course is for:

- For SAFe Practitioner (SP) Certification – Software developers, testers, Scrum Masters, Product Owners, project managers, product managers, and other practitioners involved in software development.

Prerequisites

None

Certification

This course is a requirement for those seeking certification as a Scaled Agile Framework Agilist (SA).

Leading the Lean/Agile Enterprise with the Scaled Agile Framework

Overview

In this two-day course, attendees will gain the knowledge necessary to lead an enterprise Agile transformation by leveraging the Scaled Agile Framework® and its underlying principles of lean thinking and product development flow. This course will enable you to leave with an understanding of how the principles and practices of the Framework support Lean-Agile Programs, Scaling Agile, Lean-Agile Program Portfolio Management, and Scaling Leadership.

Learning Outcomes

- Apply Lean, Agile and product development flow principles to improve productivity, employee engagement, time to market, and quality
- Explain and promote the use of SAFe
- Identify roles and structures required to scale Agile to the program level
- Execute coordinated releases across a program
- Measure the impact and progress of scaled Agile in a program
- Understand how an agile program interacts with Program Portfolio Management (PPM).

Content

- Introduction
- Lean Thinking
- Scaling Agile
- Agile Release Train
- Portfolio
- Scaling Leadership.
